

Hello!

I'm Anghel Mario, I'm 17 years old and I was born in Arad.

My story begins when at the age of two and a half I had surgery on my right ear and with the help of a cochlear implant, through which I can hear forever thanks to God who gave me a blessed chance - that is, to hear again.

I progressed my speech level by going to speech therapy, but also through the total involvement of my parents who did their best to be at the level I am at today.

I am a student at the mainstream school, being an arts college - where I am in the architecture section - with a passion for graphics. I participated with my works in a lot of big competitions where I took 1st and 2nd place. At the same time, for 3 consecutive years I have been in first place in my class.

Since the fifth grade, there was bullying from my classmates, who considered me different from them, talked behind my back and also did not communicate with me at all - always consisting of conflicts and teasing directed at me . And about the teachers...some were understanding with me, others were not. But this situation made me strong with myself and even very ambitious - always moving forward with faith in God.

This year I participated in an important event - being awarded as a volunteer by the county school inspectorate; but also for the national drawing olympiad for the architecture profile.

I wish from my heart to be known all over the world, but as an important businessman.

Thank you all for listening my story!
