Understanding others

People are different.

It is good to try to understand them.

Sometimes this is hard to do. For example:

You want to understand someone
who cannot see.

You close your eyes.

You try to walk or find someone.

It is very difficult. Maybe you can't do it.

You might use different glasses.

They can make it as different types seeing problems.

Some are more difficult than others.

So, you feel sad. And think that everyone
who cannot see is sad too.

But this is not true.

If you want to really understand them,
you need time.

You need someone to explain.

And you need to talk to people who cannot see.
